Time: 2:10 pm – 3:10 pm CEST

Room: Montreal Hall

About AgroSavfe

AgroSavfe is rapidly growing and transformative Food and Crop protection company developing a new generation of protein-based biocontrol solutions, shaping the future of sustainable and safe food supply.

Based on its ground-breaking technology platform, the Company has developed a broad pipeline of effective and safe products with novel modes of action, addressing key crop pests and diseases across the whole value chain, from soil to plate.

AgroSavfe's unique protein-based biocontrols combine the high-performance characteristics of chemicals with the clean safety profile of biologicals, making them ideal crop protection agents for both pre- and post-harvest applications. The Company is on track to launch its first biofungicide in the US in 2022, followed by global market introductions.

AgroSavfe was founded in 2013 as a spin-off from the VIB (Flemish Institute for Biotechnology) and has raised €51 million to date from specialist international investors. The Company is based in the biotech cluster in Ghent, Belgium. More information can be found on www.agrosavfe.com.
