

# Reinventing food protection

Biotallys is transforming crop protection with proprietary protein-based biocontrol solutions and aims to provide alternatives to conventional chemical pesticides for a more sustainable agriculture.

 Protein-based biocontrol food protection product candidates, offering safer and cleaner alternatives to chemical pesticides

 Distinct advantages over existing biologicals, combining chemical-like performance in the framework of IPM's with the clean safety profile of biologicals

 Antibody-based technology, validated in human therapeutics and animal health, now used for sustainable agriculture

 From idea to market ~3 years faster, at ~10% of the average cost for new products developed by the chemical pesticide industry

 Clear regulatory pathway, with first product registration dossier submitted to EU and US authorities

 Addressing the challenges faced by growers as well as the changing needs of retail, consumers and regulatory authorities

## AGROBODY Foundry™: nature driven, designed for performance

Current key crop pest and disease targets

# Safer food Better planet

Making strides to meet the challenge of food waste and residue reduction.

Diversified pipeline of various R&D programs for biofungicides and bioinsecticides for high value crops

Exploring selective strategic collaborations and partnerships to leverage the technology platform and product candidates

Clear and flexible commercialization strategy, with first product expected to be introduced first in the US followed by the EU

Strong IP position with 15 published patent families and more applications pending related to the AGROBODY™ technology, platform and pipeline

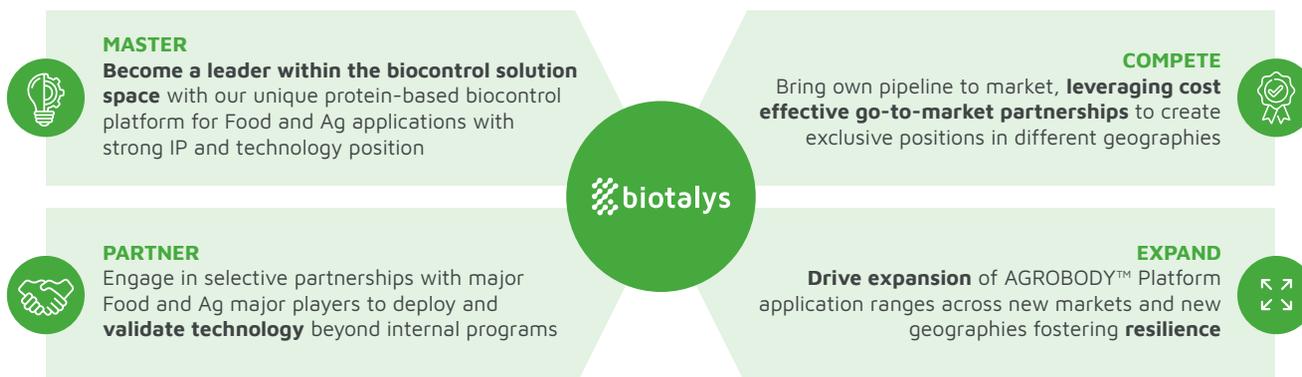

Experienced & entrepreneurial management team with a strong track record in AgTech & BioTech

Established in 2013 as a spin-off from the VIB (Flanders Institute for Biotechnology), supported by renowned investors

## Clear strategy to create sustainable value

## AGROBODY Foundry™ pipeline

Program	Type	Market	Status
EVOCA™ 1 <sup>st</sup> generation	Biofungicide (botrytis, powdery mildew)	High-value fruits & vegetables	Currently under review by regulatory authorities in US and EU
EVOCA™ Next generation	Biofungicide (botrytis, powdery mildew)	High-value fruits & vegetables	Developed to have broader application and market penetration
Pipeline	Biofungicides & bioinsecticides (a variety of key diseases and pests)	Fruits & vegetables, legumes, etc.	Targeted discovery approach Partnerships in place or being explored

EvoCa™ is pending registration. This product is not currently registered for sale or use in the United States, the EU or elsewhere, and is not being offered for sale.
